### OBJECTIVE

AI/ML and Cloud Enthusiast with hands-on experience in Computer Vision, Generative AI, AWS, RAG, MCP, and Python. Experienced in building AI projects and working with real-world computer vision data. Seeking an AI/ML, GenAI, AWS Cloud, or MLOps internship/entry-level opportunity.

### EDUCATION

|                                                                                                         |                                |
|---------------------------------------------------------------------------------------------------------|--------------------------------|
| <b>SRM Institute of Science and Technology</b><br><i>M.Sc. Applied Data Science</i>                     | 2024 – 2026<br>CGPA: 8.24 / 10 |
| <b>B. S. Abdur Rahman Crescent Institute of Science and Technology</b><br><i>B.Sc. Computer Science</i> | 2021 – 2024<br>70.49%          |

### SKILLS

**Programming:** Python, SQL

**AI / ML:** Machine Learning, NLP, Computer Vision, YOLO, Scikit-learn

**Generative AI:** RAG, MCP (Model Context Protocol), LLM Applications, Agentic AI

**AWS / Cloud:** Amazon Bedrock, Amazon SageMaker, AWS Lambda, Amazon ECR, Amazon API Gateway, AWS AgentCore

### INTERNSHIP

|                                                                                           |                                |
|-------------------------------------------------------------------------------------------|--------------------------------|
| <b>Client Linx Software Pvt. Ltd.</b><br><i>SAP BW &amp; Power BI Data Analyst Intern</i> | May 2025 – Jun 2025<br>Chennai |
|-------------------------------------------------------------------------------------------|--------------------------------|

- Worked on SAP BW fundamentals including data flow design, InfoProviders, and process chains.
- Built Power BI dashboards using Power Query, DAX measures, calculated columns, and data modeling.

|                                                                             |                                |
|-----------------------------------------------------------------------------|--------------------------------|
| <b>Lesoko Technologies Pvt. Ltd.</b><br><i>AI/ML Computer Vision Intern</i> | Jan 2026 – Mar 2026<br>Chennai |
|-----------------------------------------------------------------------------|--------------------------------|

- Annotated, cleaned, and preprocessed drone-based thermal images for an AI inspection system using YOLO-OBB models.
- Worked on an industrial project involving solar panel defect prediction using YOLO-oriented bounding boxes.

### PROJECTS

|                                                                                                  |           |
|--------------------------------------------------------------------------------------------------|-----------|
| <b>AWS MLOps — End-to-End ML Deployment</b><br><i>AWS SageMaker, S3, ECR, Lambda, CloudFront</i> | AWS Cloud |
|--------------------------------------------------------------------------------------------------|-----------|

- Built and deployed an ML inference workflow using Amazon SageMaker. Containerized inference components using Amazon ECR.
- Implemented model inference using a SageMaker endpoint and integrated AWS Lambda with the deployed ML inference workflow.
- Configured data capture and S3-based storage for monitoring model inference.

|                                                                                 |                 |
|---------------------------------------------------------------------------------|-----------------|
| <b>Vehicle Survey using YOLO</b><br><i>Python, PyTorch, OpenCV, Ultralytics</i> | Computer Vision |
|---------------------------------------------------------------------------------|-----------------|

- Developed a YOLO-based real-time vehicle detection and tracking system to monitor incoming and outgoing vehicles across multiple classes.
- Implemented vehicle classification for cars, bikes, buses, and trucks using the Ultralytics YOLO framework with OpenCV-based video processing.
